## AgloNorse Extra®

AgloNorse is an agglomerated, soft and highly palatable weaning feed. AgloNorse contains marine phospholipids and low levels of starch and triglycerides. AgloNorse Extra can significantly reduce the use of live feed

### Ingredients

Low-temperature dried fishmeal, fish hydrolysates, fish oils, marine phospholipids, natural pigments and antioxidants, minerals and vitamins.

### Storage

AgloNorse should always be stored in a dark and cool place. The product can be stored unopened, in a dark and cool place, for six months after production date. If kept refrigerated, the product can be stored for twelve months after production date. Opened boxes should always be kept refrigerated.
