

AQUACULTURE

AgloNorse Micropellet®

Aglonorse is a low temperature extruded pellet, soft and highly palatable weaning feed. AgloNorse contains phospholipids and low levels of triglycerides.

Ingredients

Low-temperature dried fish meal, fish oil, phospholipids, natural pigments and antioxidants, minerals and vitamins.

Storage

AgloNorse should always be stored in a dark and cool place. The product can be stored unopened, in a dark and cool place, for six months after production date. If kept refrigerated, the product can be stored for twelve months after production date. Opened boxes should always be kept refrigerated.
