Phosphonorse®

Nutrient enrichment for rotifers and artemia.

Technical product specification

PhosphoNorse is a high DHA enrichment for rotifers and Artemia. Phosphonorse is a blend of marine oils, phospholipids, vitamins and antioxidants. To be used for nutrient enrichment of live prey for fish larva.

Preparation

Blend in the ratio of 30 g Phosphonorse per litre of freshwater. Use an industry-mixer or a blender at moderate speed for 1-5 minutes (depending on the fraction size required). Avoid blending vast amounts of air in the emulsion.

Composition

Lipids	95 %
DHA	150 g/kg
EPA	40 g/kg
Phospholipids	50 g/kg
Astaxanthine	135 mg/kg
Vitamin mix (D, E, C)	4 g/kg
